

EU Renegotiation

Poll

20/02/2016

Prepared on behalf of the Mail on Sunday

Methodology

Fieldwork Dates

20th February 2016

Data Collection Method

The survey was conducted via telephone. A stratified random sample of landline and mobile telephone data drawn from lifestyle data sources was used.

Population Sampled

All residents aged 18+ in the United Kingdom

Sample Size

1,003

Data Weighting

Data were weighted to the profile of all UK adults. Data were weighted by age, sex, region and past vote. Targets were obtained from Office for National Statistics data and the results of the 2015 General Election.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,003 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from crossbreaks with very small sub-samples should be treated with caution.

Voting Intention

In order to assess voting intention, respondents were asked who they would be most likely to vote for if that election were tomorrow, with the responses "Labour", "Conservative", "Liberal Democrat", "UKIP" or "Another Party" prompted in a randomising order. "SNP" and "Plaid Cymru" were also prompted for respondents in Scotland and Wales respectively. As an additional weighting step, respondents who replied "undecided" and "refused" were then removed from the sample.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation (Director of Research – Patrick Briône).

EU Renegotiation Poll

Prepared on behalf of the Mail on Sunday

Table 7

Q6. Normal weightings

Q6. As another part of the renegotiation. David Cameron announced: "Child benefit for the children of EU migrants living overseas will now be paid at a rate based on the cost of living in their home country - applicable immediately for new arrivals and from 2020 onwards for the existing claimants of EU migrants who have children living overseas. Which of the following statements is closest to your view?"
