## Child Poverty Poll

## 28/09/2017

Prepared on behalf of Child Poverty Action Group

## Survation.

## Methodology

## Fieldwork Dates

$14^{\text {th }}-16^{\text {th }}$ September 2017

## Data Collection Method

The survey was conducted via online panel Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

## Population Sampled

All parents aged 18+ in the UK, whose household income is less than $£ 30,000$ p.a.

## Sample Size

1,017

## Data Weighting

Data were weighted to the profile of the population in question. Data were weighted by housing tenure, number of children and type of family unit. Targets for the weighted data were derived by Child Poverty Action Group from the Family Resources Survey.

## Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where $50 \%$ (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,017 it is $95 \%$ certain that the 'true' value will fall within the range of $3.1 \%$ from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from crossbreaks with very small sub-samples should be treated with caution.

## Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain - e.g. a scale from "strongly agree" to "strongly disagree", a list of numbers from 0 to 10 or questions which had factual rather than opinionrelated answers such as demographic information. "Other", "Don't know" and "Refused" responses are not randomised.

Not all questions will have necessarily been asked to all respondents - this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred

Data were analysed and weighted by Survation.

$\qquad$ do you usually work in your (main) job/business weekly?

## Table 13

Q13. Thinking about the following options, to what extent do they prevent you from working more hours?
Please choose on a scale where $0=$ does not prevent you from working more hours at all and $10=$ majorly prevents you from working more hours. More hours aren't available
Base : Those Respondents want to work more hours

Table 14
Q14. Thinking about the following options, to what extent do they prevent you from working more hours?
Please choose on a scale where $0=$ does not prevent you from working more hours at all and $10=$ majorly prevents you from working more hours. Lack of good childcare
Base : Those Respondents want to work more hours

## Table 18

Q18. Thinking about the following options, to what extent do they prevent you from working more hours?
Please choose on a scale where $0=$ does not prevent you from working more hours at all and $10=$ majorly prevents you from working more hours.
Carer responsibilities
Base : Those Respondents want to work more hours

## Table 19

Q19. Thinking about the following options, to what extent do they prevent you from working more hours?
Please choose on a scale where $0=$ does not prevent you from working more hours at all and $10=$ majorly prevents you from working more hours.
Travel distances
Base : Those Respondents want to work more hours

Table 37
Q37. To what extent do you agree or disagree with the following statements?
I work too much and I don't have enough time to spend with my family
Base : Respondents those who are employed

Unweighted Total
Weighted Total Strongly agree

Somewhat agree
Neither agree nor
disagree
Somewhat disagree
Strongly disagree
Don't know
