IDENTITY • INTEGRATION • MIGRATION • OPPORTUNITY

# Methodology

## Fieldwork Dates

22<sup>nd</sup> – 25<sup>th</sup> February 2018

## Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

## Population Sampled

All BME residents aged 18+ in the United Kingdom

## Sample Size

1,023

## Data Weighting

Data were weighted to the profile of all UK BME adults aged 18+. Data were weighted by age, sex, region, and ethnicity. Targets for the weighted data were derived from Office for National Statistics 2011 Census data.

## Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,023 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from cross breaks with very small sub-samples should be treated with caution.

## Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don’t know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.

Q5. Some people feel uncomfortable with the choices that their children or grandchildren might make about their relationships. Regardless of whether you have children at the moment, how would you feel if your child or grandchild were to have a serious relationship or marriage with any of the following?  
Someone who is from a much wealthier background

Base: All Respondents

**Immigration Poll - BME**  
Prepared on behalf of British Future

11 Apr 2018

**Table 189**  
Q95. To what extent do you agree or disagree with each of the following statements?  
"It's one thing to have concerns about immigration and quite another to take it out on people because of where they come from or the colour of their skin.  
It's important to have an open debate about immigration policies, but there's no place for racism and prejudice in Britain."

**Table 190**  
Q95. To what extent do you agree or disagree with each of the following statements?  
"It's one thing to have concerns about immigration and quite another to take it out on people because of where they come from or the colour of their skin.  
It's important to have an open debate about immigration policies, but there's no place for racism and prejudice in Britain."
