

Future of the UK Poll

13/09/2014

Prepared on behalf of the Mail on Sunday

Methodology

Fieldwork Dates

12th September 2014

Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

Population Sampled

All residents aged 18+ in Great Britain (questions after voting intention based on all residents aged 18+ in England & Wales)

Sample Size

1,090 (Great Britain)
1,007 (England & Wales)

Data Weighting

Data were weighted to the profile of all adults aged 18+. Data were weighted by age, sex, region, household income, education and past vote. Targets for the weighted data were derived from Office of National Statistics 2011 Census data and the results of the 2010 General Election.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,007 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from crossbreaks with very small sub-samples should be treated with caution.

Voting Intention

In order to assess voting intention, we first asked respondents how likely they would be to vote in the next election on a scale of 0-10. This likelihood to vote for was then used to weight voters' responses, such that respondents replying "10" were weighted by a factor of 1.0, whilst those responding "9" were weighted by a factor of 0.9, and so on down to responses of "0" being excluded altogether.

Respondents were then asked who they would be most likely to vote for if that election were tomorrow, with the responses "Labour", "Conservative", "Liberal Democrat" and "UKIP" prompted in a randomising order, and other parties displayed if respondents selected "Another Party". For respondents in Scotland and Wales, "SNP" and "Plaid Cymru" respectively were included in the main prompt.

As an additional weighting step, respondents who replied "undecided" and "refused" were then removed from the sample. Undecided respondents were then re-inserted into the sample based on a factor of which party they voted for in the 2010 general election. Final published voting intention can therefore be found in the final table of each section.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation and presented by Patrick Bri ne and Damian Lyons Lowe.

Table 22

Q14. According to a UK government report, Scotland's public spending per head is higher than the UK average. Some people say this is fair because North Sea oil revenues mean that Scotland contributes more revenue per capita than the rest of the UK. Other people say North Sea oil revenues are not sufficient to justify higher than average public spending in Scotland.

Which of the following is closest to your opinion?

Table 24

Q16. The SNP argue that if Scotland becomes independent, Scotland should receive all the revenues from North Sea oil and gas fields that are closer to Scotland than England - representing about 90% of the UK's current £5bn of oil and gas revenues, because they would become a national resource belonging to Scotland. Some commentators in the UK, however, suggest that the rest of the UK should continue to receive a share of these revenues, on the basis of past UK investment in infrastructure to extract the oil and gas. Which statement is closest to your opinion?

23	18	Q10. On 18th September there will be a referendum held in Scotland which asks the question 'Should Scotland become an independent country? Would you prefer Scotland to vote 'Yes' to becoming independent, 'No' to becoming independent, or do you not mind?	Base : rUK	1007
24	19	Q11. Will you feel happy or upset if Scotland votes 'Yes' to independence?	Base : rUK	1007
25	20	Q12. If Scotland votes to become an independent country, the UK Labour Party will lose 40 MPs, making it harder for them to win an overall majority and form a government in Westminster. Do you think this would be good or bad for the rest of the United Kingdom?	Base : rUK	1007
26	21	Q13. If Scotland votes 'No' to independence, Prime Minister David Cameron has agreed to former Prime Minister Gordon Brown's plan to devolve further powers to the Scottish Parliament. To what extent do you approve or disapprove of this plan?	Base : rUK	1007
27	22	Q14. According to a UK government report, Scotland's public spending per head is higher than the UK average. Some people say this is fair because North Sea oil revenues mean that Scotland contributes more revenue per capita than the rest of the UK. Other people say North Sea oil revenues are not sufficient to justify higher than average public spending in Scotland. Which of the following is closest to your opinion?	Base : rUK	1007
28	23	Q15. Which of the following is closest to your opinion?	Base : rUK	1007
29	24	Q16. The SNP argue that if Scotland becomes independent, Scotland should receive all the revenues from North Sea oil and gas fields that are closer to Scotland than England - representing about 90% of the UK's current £5bn of oil and gas revenues, because they would become a national resource belonging to Scotland. Some commentators in the UK, however, suggest that the rest of the UK should continue to receive a share of these revenues, on the basis of past UK investment in infrastructure to extract the oil and gas. Which statement is closest to your opinion?	Base : rUK	1007
30	25	Q17. Which of the following statements is closest to your opinion?	Base : rUK	1007
