

Camborne & Redruth Constituency Poll

26/11/2014

Prepared on behalf of the University of Exeter

Methodology

Fieldwork Dates

25th November 2014

Data Collection Method

The survey was conducted via telephone. A combination of random numbers seeded from the BT directories of households in the local wards and a smaller amount of targeted lifestyle data for specific age brackets were called.

Population Sampled

All residents aged 18+ in the Parliamentary constituency of Camborne & Redruth

Sample Size

500

Data Weighting

Data were weighted to the profile of all residents in Camborne & Redruth aged 18+. Data were weighted by age, sex and ward. Targets for the weighted data were derived from Office of National Statistics 2011 Census data and the results of the 2010 General Election.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 500 it is 95% certain that the 'true' value will fall within the range of 4.4% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from crossbreaks with very small sub-samples should be treated with caution.

Voting Intention

In order to assess voting intention, we first asked respondents how likely they would be to vote in the next election on a scale of 0-10. This likelihood to vote for was then used to weight voters' responses, such that respondents replying "10" were weighted by a factor of 1.0, whilst those responding "9" were weighted by a factor of 0.9, and so on down to responses of "0" being excluded altogether.

Respondents were then asked who they would be most likely to vote for if that election were tomorrow, with the responses "Labour", "Conservative", "Liberal Democrat" and "UKIP" prompted in a randomising order, and "Green" and "Mebyon Kernow" prompted if respondents said "Another Party".

As an additional weighting step, respondents who replied "undecided" and "refused" were then removed from the sample.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been read to respondents in a randomising order. “Don't know” and “Refused” responses are not prompted.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation and presented by Patrick Bri ne and Damian Lyons Lowe.
