

Topical Poll

04/12/2017

Prepared on behalf of 38 Degrees

Topical Poll

Survation.

Methodology

Fieldwork Dates

27th – 30th November 2017

Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

Population Sampled

All residents aged 16+ in Scotland.

Sample Size

1,017

Data Weighting

Data were weighted to the profile of all Scottish adults aged 16+. Data were weighted by age, sex, region, 2017 General Election vote and 2014 referendum vote. Targets for the weighted data were derived from Office of National Statistics data, the results of the 2017 UK General Election and the 2014 referendum result.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,017 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from cross breaks with very small sub-samples should be treated with caution.

Voting Intention

In order to assess voting intention, we first asked respondents how likely they would be to vote in the next general election on a scale of 0-10. This likelihood to vote for was then used to weight voters' responses, such that respondents replying "10" were weighted by a factor of 1.0, whilst those responding "9" were weighted by a factor of 0.9, and so on down to responses of "0" being excluded altogether.

Respondents were then asked who they would be most likely to vote for if that election were tomorrow, with the responses "Scottish Labour", "Scottish Conservative and Unionist", "Scottish Liberal Democrat" and "Scottish National Party (SNP)" prompted in a randomising order, and other parties displayed if the respondents selected "Another Party". When asked who they would be most likely to vote for with their regional list vote, the responses "Scottish Green Party" and "UKIP" were also prompted in a randomising order. These responses were not prompted for other questions about voting intention. As an additional weighting step, respondents who replied "undecided" and "refused" were then removed from the sample.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.

4 Dec 2017

Table 1
Q1. Under the Scotland Act (1998), policies related to food, fishing, farming and the environment were devolved to the Scottish Parliament, although in practice they were controlled by the EU. Following Brexit, power over these issues will be repatriated to the UK, but it is unknown whether the UK Parliament in Westminster or the Scottish Parliament in Holyrood will end up having power over these issues. Which of the following statements is closest to your view?

Topical Poll
Prepared on behalf of 38 Degrees

4 Dec 2017

Table 3

Q3. The Scottish Government has published options for potential changes to income tax in order for Scotland to invest at least £200 million pounds more in better public services.

A final proposal will be voted on by MSPs (Members of the Scottish Parliament) as part of the budget in December 2017.

To what extent do you agree or disagree with the following statement?

'I support the idea of gradual increases in tax that would aim to raise at least £200 million to fund better public services, with higher earners paying more tax and lower earners paying the same or less tax than they currently do.'

Table 5
Q5. Another proposal suggests that income tax goes up 1p for every pound you earn over £24,001 a year, an additional 1p for every pound you earn over £44,291 a year, and an additional 3p for every pound you earn over £150,000 a year.
To what extent do you agree or disagree with this proposal?*
