Poll on the Common Agricultural Policy

Survation.

Methodology

Fieldwork Dates

13th – 16th February 2018

Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

Population Sampled

All residents aged 16+ in Scotland.

Sample Size

1,033

Data Weighting

Data were weighted to the profile of all Scottish adults aged 16+. Data were weighted by age, sex, region, 2017 General Election vote and 2014 referendum vote. Targets for the weighted data were derived from Office of National Statistics data, the results of the 2017 UK General Election and the 2014 referendum result.

Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where 50% (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,033 it is 95% certain that the 'true' value will fall within the range of 3.1% from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from cross breaks with very small sub-samples should be treated with caution.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 18
Q16. By Normal Weighting
Q16. The Common Agricultural Policy is a European Union programme designed to support farmers and promote rural development. It aims to increase productivity in farming, to ensure a fair standard of living for farmers and to ensure consumers have reliable supplies of reasonably priced food. It includes some environmental payments and measures to encourage rural development. The Common Agricultural Policy applies to countries that are members of the European Union, including Scotland. Approximately how much money do you believe is spent in Scotland every year as part of the Common Agricultural Policy, or do you not know?
Note: please answer honestly, if you do not know, we are still interested in your views

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 19
Q17. By Normal Weighting
Q17. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.
To what extent do you support or oppose money being spent on payments for farmers based on the amount and type of land they farm under Pillar 1 of the CAP?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 22
Q20. By Normal Weighting
Q20. Currently, a farm must be a minimum size of three hectares before its owners qualify for any payments under the Common Agricultural Policy. A hectare is 10,000 square meters. Three hectares is about four football fields. In Scotland, there are more than 10,000 farms with fewer than three hectares, including many market garden scale businesses producing vegetable boxes for sale at farmers' markets. They receive no money from the CAP because they have fewer than three hectares of land. Would you support or oppose farmers with fewer than three hectares receiving support from the Common Agricultural Policy in the future?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 23
Q21. By Normal Weighting
Q21. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.
Which pillar of the Common Agricultural Policy do you think is a better use of public money?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 24
Q22. By Normal Weighting
Q22. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.
To what extent do you believe that the distribution of public funds between Pillars One and Two of the Common Agricultural Policy is fair for Scotland's rural communities?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 25
Q23. By Normal Weighting
Q23. Currently, the way in which Common Agricultural Policy money is spent in Scotland is decided by the Scottish Government, in line with European Union rules. After Britain leaves the European Union, it is possible that control of this money could pass completely to the central Westminster government, or continue to be devolved to the Scottish government. After Brexit, who do you think should have control of spending on agriculture in Scotland?

Poll on the Common Agricultural Policy

Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 26

Q24. By Normal Weighting

Q24. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.

Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:

On supporting farmers with the most productive land, with more productive farms receiving higher payments per hectare farmed

Poll on the Common Agricultural Policy

Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 29

Q27. By Normal Weighting

Q27. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.

Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:

On supporting farmers and land managers deliver wider public benefits such as protecting biodiversity, limiting farms' greenhouse gas emissions, improving water quality and enhancing opportunities for recreation

Poll on the Common Agricultural Policy

Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 32

Q30. By Normal Weighting

Q30. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.

Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:

On reducing pollution from farms

Poll on the Common Agricultural Policy

Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 35

Q33. By Normal Weighting

Q33. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.

Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:

On helping farmers sell more food in local shops and markets

Base: All Respondents

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 37
Q35. By Normal Weighting
Q35. Please read: In Scotland, some species of wildlife have recorded a 50% decline in population since 1995, and the biodiversity of plants has fallen by 10% over the same period, according to the 2016 State of Nature report by the Royal Society for the Protection of Birds (RSPB) and other conservation organisations. On a scale of 0-10, where 0 means strongly oppose, 10 means strongly support and 5 means neither support nor oppose, to what extent would you support or oppose money from the Common Agricultural Policy being spent on changing farming practices to be more wildlife-friendly?

Base: Half of respondents, chosen at random

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 39
Q37. By Normal Weighting
Q37. Please read: According to the Scottish Government, agriculture accounts for around 25% of greenhouse gas emissions in Scotland. On a scale of 0-10, where 0 means strongly oppose, 10 means strongly support and 5 means neither support nor oppose. To what extent would you support or oppose money from the Common Agricultural Policy being spent on encouraging practices that minimise the contribution of agriculture to climate change by, for example, using more renewable energy, growing trees and restoring peatlands that "lock in" carbon?

Base: Half of respondents, chosen at random

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 40
Q38. By Normal Weighting
Q38. On a scale of 0-10, where 0 means strongly oppose, 10 means strongly support and 5 means neither support nor oppose, to what extent would you support or oppose money from the Common Agricultural Policy being spent on encouraging practices that minimise the contribution of agriculture to climate change by, for example, using more renewable energy, growing trees and restoring peatlands that "lock in" carbon?

Base: Half of respondents, chosen at random

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 41
Q39. By Normal Weighting
Q39. Please read: The United Nations Food and Agriculture Organization has warned that current farming practices dangerously erode fertile topsoil. It estimates that on current trends the world's ability to grow crops will have been dramatically reduced within 60 years. and restoring peatlands that "lock in" carbon? Common Agricultural Policy being spent on encouraging farmers to look after soil better?

Base: Half of respondents, chosen at random

Poll on the Common Agricultural Policy

Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 43
Q41. By Normal Weighting
Q41. Public money is money generated by the government through taxation and other means to provide "public goods" to the general public. Agriculture can provide "public goods" beyond simply providing food, for example, it can support improved soil quality and water quality, wildlife, as well as local culture and vibrant rural communities. To what extent would you support or oppose public payments to farmers being given based on the amount of "public goods" they deliver?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 44
Q42. By Normal Weighting
Q42. Currently, there are very few environmental, animal welfare, food safety or other conditions attached to the public money farmers receive as payments in Pillar One of the CAP. In the future, to what extent would you support or oppose farmers having to meet specific conditions in order to receive public money?

Poll on the Common Agricultural Policy
Prepared on behalf of Scottish Environment LINK

21 Feb 2018

Table 45
Q43. By Normal Weighting
Q43. To what extent would you support or oppose farmers having to prove they were meeting any of the following conditions to receive public money in the future?
Showing that they are helping reduce climate change and other environmental impacts of farming such as soil fertility and water quality

Base: All Respondents

	16	13	Q11. For each of the following issues, to what extent do you believe that they are well looked after or not well looked after on Scottish farms? Soil quality	Base: All Respondents	1033
	17	14	Q12. For each of the following issues, to what extent do you believe that they are well looked after or not well looked after on Scottish farms? Animal welfare	Base: All Respondents	1033
	18	15	Q13. Do you believe that pollution levels from Scottish farms are too high, or are at acceptable levels?	Base: All Respondents	1033
	19	16	Q14. Have you heard of the European Union's Common Agricultural Policy? Note: please answer honestly, if you have not heard of it, we are still interested in your views	Base: All Respondents	1033
	20	17	Q15. What is the European Union's Common Agricultural Policy? Note: please answer honestly, if you do not know, we are still interested in your views	Base: Those who said they had heard of the Common Agricultural Policy	486
	21	18	Q16. The Common Agricultural Policy is a European Union programme designed to support farmers and promote rural development. It aims to increase productivity in farming, to ensure a fair standard of living for farmers and to ensure consumers have reliable supplies of reasonably priced food. It includes some environmental payments and measures to encourage rural development. The Common Agricultural Policy applies to countries that are members of the European Union, including Scotland. Approximately how much money do you believe is spent in Scotland every year as part of the Common Agricultural Policy, or do you not know? Note: please answer honestly, if you do not know, we are still interested in your views	Base: All Respondents	1033

	Page	Table	Title	Base Description	Base
	22	19	<p>Q17. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.</p> <p>To what extent do you support or oppose money being spent on payments for farmers based on the amount and type of land they farm under Pillar 1 of the CAP?</p>	Base: All Respondents	1033
	23	20	<p>Q18. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.</p> <p>To what extent do you support or oppose money being spent on rural development, including environmental work, innovation and advice to farmers under Pillar 2 of the CAP?</p>	Base: All Respondents	1033

	Page	Table	Title	Base Description	Base
	24	21	<p>Q19. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.</p> <p>To what extent do you support or oppose large farms with better quality land receiving more support under Pillar 1 of the CAP?</p>	Base: All Respondents	1033
	25	22	<p>Q20. Currently, a farm must be a minimum size of three hectares before its owners qualify for any payments under the Common Agricultural Policy. A hectare is 10,000 square meters. Three hectares is about four football fields. In Scotland, there are more than 10,000 farms with fewer than three hectares, including many market garden scale businesses producing vegetable boxes for sale at farmers' markets. They receive no money from the CAP because they have fewer than three hectares of land.</p> <p>Would you support or oppose farmers with fewer than three hectares receiving support from the Common Agricultural Policy in the future?</p>	Base: All Respondents	1033

	Page	Table	Title	Base Description	Base
	26	23	<p>Q21. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.</p> <p>Which pillar of the Common Agricultural Policy do you think is a better use of public money?</p>	Base: All Respondents	1033
	27	24	<p>Q22. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The Common Agricultural Policy is organised into two "Pillars". Pillar One receives 70% of total CAP spending in Scotland. Farmers receive a payment for every hectare of land they farm. Generally speaking, the amount of money a farm receives is decided by the size of the farm and the productivity of its land. Larger farms on better quality land tend to receive more money than smaller farms on poorer quality land. The remaining 30% of CAP spending falls under Pillar Two, and is spent to meet wider rural development goals, including environmental measures such as organic farming, tree-planting, managing the land to look after wildlife, innovation, advice, public access, and supporting local development projects.</p> <p>To what extent do you believe that the distribution of public funds between Pillars One and Two of the Common Agricultural Policy is fair for Scotland's rural communities?</p>	Base: All Respondents	1033
	28	25	<p>Q23. Currently, the way in which Common Agricultural Policy money is spent in Scotland is decided by the Scottish Government, in line with European Union rules. After Britain leaves the European Union, it is possible that control of this money could pass completely to the central Westminster government, or continue to be devolved to the Scottish government.</p> <p>After Brexit, who do you think should have control of spending on agriculture in Scotland?</p>	Base: All Respondents	1033

	Page	Table	Title	Base Description	Base
	29	26	<p>Q24. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.</p> <p>Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:</p> <p>On supporting farmers with the most productive land, with more productive farms receiving higher payments per hectare farmed</p>	Base: All Respondents	1033
	30	27	<p>Q25. Under the Common Agricultural Policy, £600 million of public money is spent annually in Scotland to support farmers. The current basis for the bulk of farming subsidies is based on the area that the business has responsibility for, and the quality of the land in this area, with possession of higher quality land resulting in higher payments. If the UK leaves the European Union it may be possible for the UK and Scottish Governments to allocate money and support to farmers and other land managers in a different way.</p> <p>Imagine the UK does leave the EU as scheduled, and the Government has the chance to spend this money differently. In the future, to what extent would you support or oppose it being spent in the following ways:</p> <p>On supporting farmers with the least productive land, with farms whose land is less productive and more difficult to farm receiving higher payments</p>	Base: All Respondents	1033

	43	40	Q38. On a scale of 0-10, where 0 means strongly oppose, 10 means strongly support and 5 means neither support nor oppose, to what extent would you support or oppose money from the Common Agricultural Policy being spent on encouraging practices that minimise the contribution of agriculture to climate change by, for example, using more renewable energy, growing trees and restoring peatlands that "lock in" carbon?	Base: Half of respondents, chosen at random	524
	44	41	Q39. Please read: The United Nations Food and Agriculture Organization has warned that current farming practices dangerously erode fertile topsoil. It estimates that on current trends the world's ability to grow crops will have been dramatically reduced within 60 years. and restoring peatlands that "lock in" carbon? Common Agricultural Policy being spent on encouraging farmers to look after soil better?	Base: Half of respondents, chosen at random	508
	45	42	Q40. On a scale of 0-10, where 0 means strongly oppose, 10 means strongly support and 5 means neither support nor oppose, to what extent would you support or oppose money from the Common Agricultural Policy being spent on encouraging farmers to look after soil better?	Base: Half of respondents, chosen at random	524
	46	43	Q41. Public money is money generated by the government through taxation and other means to provide "public goods" to the general public. Agriculture can provide "public goods" beyond simply providing food, for example, it can support improved soil quality and water quality, wildlife, as well as local culture and vibrant rural communities. To what extent would you support or oppose public payments to farmers being given based on the amount of "public goods" they deliver?	Base: All Respondents	1033
	47	44	Q42. Currently, there are very few environmental, animal welfare, food safety or other conditions attached to the public money farmers receive as payments in Pillar One of the CAP. In the future, to what extent would you support or oppose farmers having to meet specific conditions in order to receive public money?	Base: All Respondents	1033
	48	45	Q43. To what extent would you support or oppose farmers having to prove they were meeting any of the following conditions to receive public money in the future? Showing that they are helping reduce climate change and other environmental impacts of farming such as soil fertility and water quality	Base: All Respondents	1033

	Page	Table	Title	Base Description	Base
	49	46	Q44. To what extent would you support or oppose farmers having to prove they were meeting any of the following conditions to receive public money in the future? Showing that they are supporting Scottish wildlife	Base: All Respondents	1033
