

Councillors

Poll

25/04/2018

Prepared on behalf of the Joseph Rowntree
Foundation

Methodology

Fieldwork Dates

3rd - 19th April 2018

Data Collection Method

The survey was conducted via telephone interview.

Population Sampled

Conservative council leaders and Conservative housing leaders in the UK

Sample Size

121

Data Weighting

Due to the nature of the poll, the data presented has not been weighted.

Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain – e.g. a scale from “strongly agree” to “strongly disagree”, a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. “Other”, “Don't know” and “Refused” responses are not randomised.

Not all questions will have necessarily been asked to all respondents – this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.
