## Brexit Poll

07/07/2018
Prepared on behalf of The Mail on Sunday

## Methodology

## Fieldwork Dates

$7^{\text {th }}$ July 2018

## Data Collection Method

The survey was conducted via online panel. Invitations to complete surveys were sent out to members of the panel. Differential response rates from different demographic groups were taken into account.

Population Sampled

All residents aged 18+ in the United Kingdom
Sample Size
1,007

## Data Weighting

Data were weighted to the profile of all UK adults aged 18+. Data were weighted by age, sex, region, household income, education, 2017 General Election vote and 2016 EU Referendum vote. Targets for the weighted data were derived from Office for National Statistics 2011 Census data, and the results of the 2017 General Election and 2016 EU Referendum.

## Margin of Error

Because only a sample of the full population was interviewed, all results are subject to margin of error, meaning that not all differences are statistically significant. For example, in a question where $50 \%$ (the worst case scenario as far as margin of error is concerned) gave a particular answer, with a sample of 1,007 it is $95 \%$ certain that the 'true' value will fall within the range of $3.1 \%$ from the sample result. Subsamples from the cross-breaks will be subject to higher margin of error, conclusions drawn from cross breaks with very small sub-samples should be treated with caution.

## Voting Intention

In order to assess voting intention, we first asked respondents how likely they would be to vote in the next election on a scale of $0-10$. This likelihood to vote for was then used to weight voters' responses, such that respondents replying " 10 " were weighted by a factor of 1.0 , whilst those responding " 9 " were weighted by a factor of 0.9 , and so on down to responses of " 0 " being excluded altogether.

Respondents were then asked who they would be most likely to vote for if that election were tomorrow, with the responses "Labour", "Conservative" and "Liberal Democrat" prompted in a randomising order, and other parties displayed if respondents selected "Another Party". For respondents in Scotland and Wales, "SNP" and "Plaid Cymru" respectively were included in the main prompt. Respondents in Northern Ireland were asked the same question, with "DUP", "Sinn Fein", "UUP", "SDLP" and "Alliance Party" and prompted in a randomising order.

As an additional weighting step, respondents who replied "undecided" and "refused" were then removed from the sample.

## Question presentation

All data tables shown in full below, in order and wording put to respondents, including but not limited to all tables relating to published data and all relevant tables preceding them. Tables for demographic questions might not be included but these should be clear from the cross-breaks on published tables. In all questions where the responses are a list of parties, names or statements, these will typically have been displayed to respondents in a randomising order. The only questions which would not have had randomising responses would be those in which there was a natural order to maintain - e.g. a scale from "strongly agree" to "strongly disagree", a list of numbers from 0 to 10 or questions which had factual rather than opinion-related answers such as demographic information. "Other", "Don't know" and "Refused" responses are not randomised.

Not all questions will have necessarily been asked to all respondents - this is because they may be follow-on questions from previous questions or only appropriate to certain demographic groups. Lower response counts should make clear where this has occurred.

Data were analysed and weighted by Survation.

Survation Ltd Registered in England \& Wales Number 07143509

All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that they lie within 2 points.

## Table 1

Q1. Likelihood to Vote - By Normal Weighting
Q1. If there were to be another general election, on a scale of $0-10$, where 10 is certain and 0 is would not vote, how likely would you be to vote?

Base: All Respondents

| 22 | 19 | Q6. The cabinet finally agreed the government's position on Brexit talks at yesterday's Chequers summit.The agreement includes: <br> a. A new UK-EU 'free trade area,' with the UK having the same customs regimes, and identical regulations for industrial, agricultural and <br> food goods as the EU. The UK's much larger services sector would lose their current levels of access to the EU market. <br> b. The government has stated free movement of people will end, to be replaced a 'mobility framework' - however is is unclear how this would differ from the controls currently available under EU rules. <br> c. The agreement says that jurisdiction of the European Court of Justice will end, however UK courts would pay 'due regard' to European Court of Justice rulings on trade for goods but new joint working between British and European judges will need to be set up <br> Considering the agreement, do you...? | Base: All Respondents | 1007 |
